

The ARRL Radio Lab is an innovative test station that supports experimentation with integrated equipment configurations, remote operating, automation, and control. The Radio Lab is an extension of the ARRL's equipment testing capabilities for QST Product Review. The station is located at ARRL Headquarters, and is dedicated to the memory of Laird Campbell, W1HQ (SK, 1939 – 2002), who was an ARRL staff member from 1954 – 1989.
